OUR PRODUCTS

We offers innovative solutions in mobile apps, web development and Custom software. We prioritize client satisfaction and use cutting-edge technology. Our portfolio showcases our expertise in delivering tailored solutions for various needs, including e-commerce and business management. We're dedicated to excellence and our client's success.

Business i ERP

The easiest ERP tool for business with 100% implementation

BUSINESS CHALLENGE :

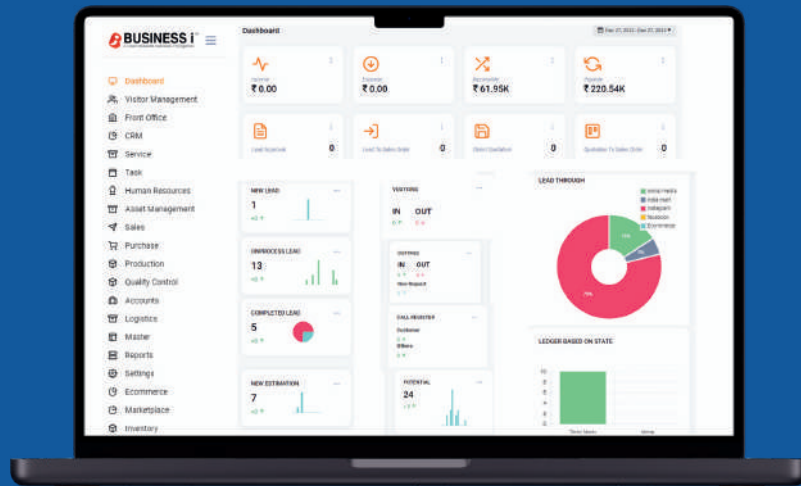

For Businesses, one of the main challenges is finding an affordable and reliable ERP (Enterprise Resource Planning) software solution that meets their specific needs. They need a solution that can help them streamline their operations, increase efficiency, and save costs.

THE MAIN CHALLENGE :

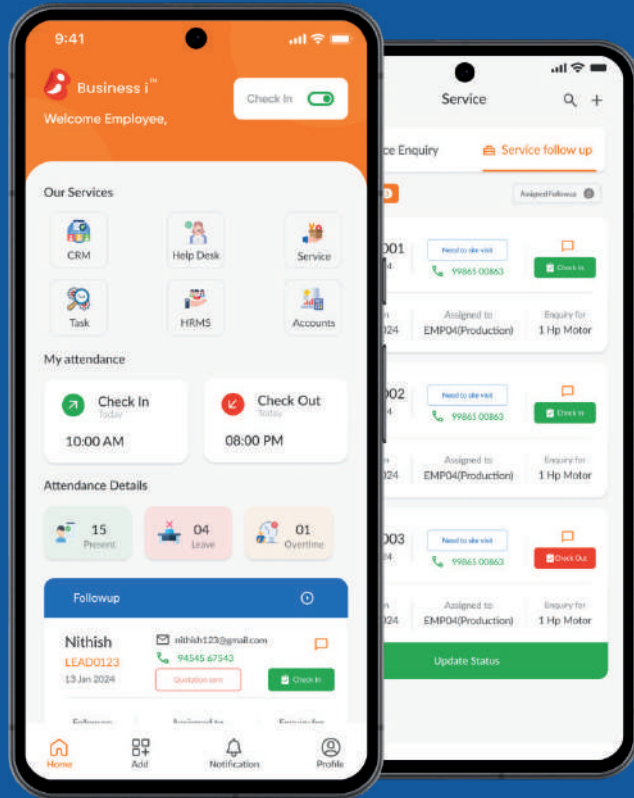

The main challenge faced by businesses is the need for a flexible and secure ERP solution that can optimize their productivity. They require a system that can efficiently manage various business processes, such as sales, purchasing, inventory management, and visitor management.

SOLUTION :

Business i offers a cloud-based ERP software solution specifically designed for businesses. Our ERP system provides a centralized and integrated platform for managing various business processes, including CRM, manufacturing, inventory management, finance, and HR/payroll. The solution aims to simplify and optimize business operations, allowing for better data management and improved customer service.

Business i ERP

SERVICES :

Business i provides ERP software solutions to small businesses. Their service includes software setup, configuration, and support. They claim to offer simplistic and insightful solutions to help businesses achieve their objectives in an affordable manner.

BUSINESS BENEFITS :

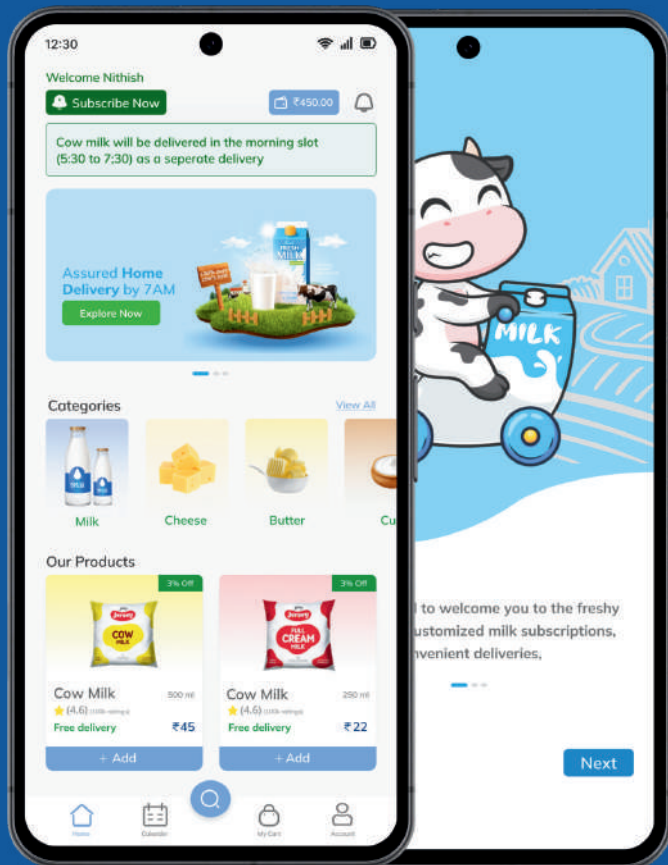

By utilizing Business i ERP software, businesses can experience various benefits. These include increased efficiency, streamlined workflows, improved customer service, better supply chain management, and cost savings on staff onboarding and training. The cloud-based nature of the ERP system also allows for easy accessibility and flexibility, enabling businesses to access their data from anywhere at any time.

TECHNOLOGIES :

Milk Delivery App

Boosting your milk delivery business with our app

BUSINESS CHALLENGE :

The business faced difficulties in managing and optimizing milk delivery operations efficiently. Manual processes led to inefficiencies, such as inaccuracies in delivery schedules, inventory management issues, and difficulties in tracking customer orders.

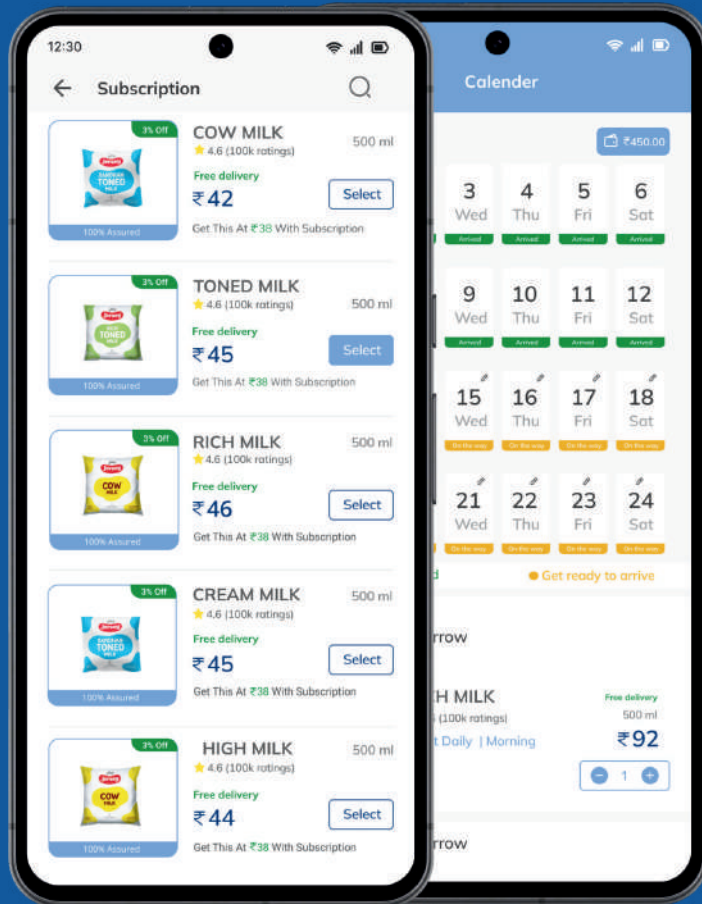

THE MAIN CHALLENGE :

The primary challenge is to streamline milk delivery operations, including managing orders, routes, inventory, and payments, while ensuring timely and accurate deliveries to customers.

SOLUTION :

Adhoc Softwares developed a comprehensive milk delivery app that addressed the challenges faced by the business. The app offers robust features for order management, route optimization, real-time tracking, payment integration, and customer management, ensuring smooth and efficient milk delivery operations.

Milk Delivery App

SERVICES :

Adhoc Softwares provides end-to-end service, from initial consultation and requirement analysis to app development, testing, deployment, and ongoing support and maintenance. Our team works closely with clients to understand their specific needs and deliver customized solutions tailored to their business requirements.

BUSINESS BENEFITS :

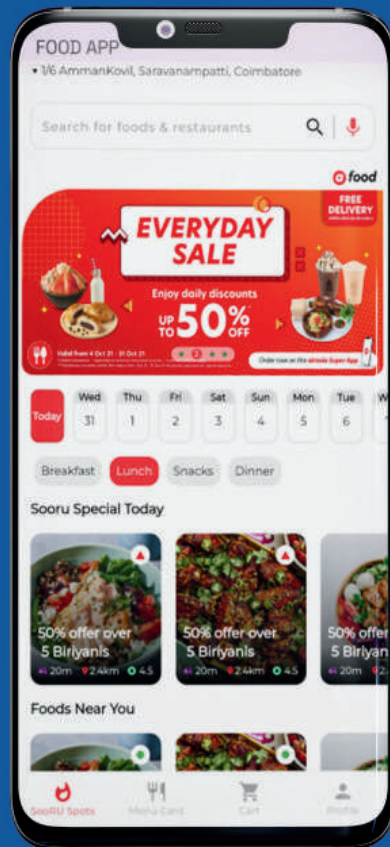

- **Streamlined operations:** The milk delivery app automates processes, reducing manual errors and improving overall efficiency.
- **Enhanced customer experience:** Customers can easily place orders, track deliveries in real-time, and manage their subscriptions, leading to higher satisfaction levels.
- **Improved resource utilization:** Route optimization features optimize delivery routes, reducing fuel costs and maximizing the productivity of delivery personnel.
- **Increased revenue opportunities:** The app's user-friendly interface and seamless payment integration attract more customers, leading to increased sales and revenue for the business.

TECHNOLOGIES :
